## Ham It Forward™

**The fastest and easiest way to grow your club!**

Imagine a world where clubs are freed from the drudgery of teaching to the exam, but are free to excite, inspire, and elmer their students with real-life stories and practical information about ham radio.

Let *us* teach the exam, and let your hamstructors teach how to select radios and antennas, program handhelds, what (and what *not!*) to say on the air, public service, Field Day, contesting and awards, chasing DX, QSL cards, DXpeditions, and a dozen other topics that your students *want* to learn!

**Achieve a higher pass rate!**

**HamTestOnline™** is the *most effective* study method, which explains our top rating on eHam.net, with more 5-star reviews than *all other study methods combined!*

It's a no-brainer – you pass the exam or get a full refund!

Instead of giving each student a \$30 book, give them our interactive online course with study materials, question drill with intelligent repetition, practice exams with memory, *and a 100% money-back guarantee!*

**Discounts available**

For clubs, schools, and other organizations that want to **Ham It Forward™**, we give a 20% discount on the Technician course, dropping the price to **\$19.95 per student** (minimum 5 per order) to fit within any group's budget!

See the **HamTestOnline™** website for details!
